100 x 150mm Pre Cast Panel Shims AS 3850.1:2015

These plastic panel shims are designed to be used under concrete precast or tilt-up panels to gain alignment. This can be achieved with little fuss as shims are colour coded and have a non skid surface. Made from the same polypropylene material as our plastic window packers suitable for precast panels, leveling window and door frames or packing studs in cladding or stumping applications.

Designed and tested to meet working load limit of 20 tonnes. Both full size panel and half [size precast panel shims](#) meet the requirements of AS 3850.1:2015 and are made in Australia.

- 100mm x 150mm
- Thickness: 1mm, 2mm, 3mm, 5mm, 10mm, 15mm, 20mm
