SCM-S Chem Stud 316 Stainless

These are stainless steel chem anchor studs for use with glass capsule chemical adhesive. The chisel point point breaks the glass capsule (within the embedment) in one clean and simple action, activating the chemical. Designed as a 'spin-in' stud type – hex head drive assists with ease of installation.

- 316 (A4-70) stainless steel material grade.
- Nut-setter to suit included in box
