T17C-C Treated Pine Screws Torx Drive

5 New Lengths Added!

10g x 40/50mm and 12g x 65/75/100mm

We have come along way from the humble galvanised chipboard screws for treated pine construction. The type 17 (T17) screws have the ideal milled point and cutting threads needed to secure pine timbers with ease – no pre drilling required.

Experience a reliable self drilling screws for hardwoods and treated pine timber construction. Now with added corrosion protection from the chemicals found in treated pine – extend the life of your structure.

- **Ruspert protective coating** extends the life of screws used in treated pine structures
- Torx drive has more contact with the driver bit and makes for efficient fixing with less wobble and cam out
- **Countersunk** ribbed head will embed every-time without the need to pre-countersink
- **T25** torx bit supplied with every box to get you going

TECHNICAL INFO:

INSTALLATION

- **Drill Capacity:** For use in many types of timber including treated pine.
- **Driver Type:** T25 Torx Drive
- **Installation Speed:** 1500 RPM Max Drill Speed

PHYSICAL CHARACTERISTICS

- **Head Type:** Countersunk ribbed
- **Point Type:** Type 17 milled point
- **Material:** Carbon Steel
- **Finish:** Ruspert
- **Head Dia:** 8g (8.3mm), 10g (9.3mm)
- **Head Height:** 8g, 10g (6mm)

Timber screws for treated pine.

The only construction screw with a 6-lobe torx drive head for secure and reliable driving of screws. The type 17 serrated point eliminates the need for pilot holes, suitable to self drill most hardwoods and treated pine timbers.
