## AF® 15W LED Clamplight CL1700

Got an interior job going on that has very little natural light? What about that task that must be finished, even as dusk approaches, otherwise you have to return the next day? Or do you have a deadline for project completion that requires overnight work?

There are many reasons for working in less than ideal illumination, and a robust work light is a tradie's best friend. But don't be limited by products that only allow you to place it in restrictive places; look for the portable solution that allows you to put the product anywhere, for illumination from below, above, from the side, anywhere. To achieve this, look to Allfasteners' own Clamplight, for super-bright LED light for all situations.

With a rechargeable Li-ion battery and cordless placement, this 1700 lumen Clamplight features 360° rotation with forward and backward tilt. And the heavy duty 35mm base clamp allows you to place it anywhere.

Whether you're a painter, electrician, plumber or anyone else, Allfasteners' Clamplight 1700 work light projects a 120° beam to cover a nice wide area with bright light, and its adjustable beam settings (hi and lo) give you just the right amount of light for any application.

And you can plan ahead easily with Clamplight – a short 4.5-hour charge time means that within the same working day you can have two products on the go and on charge at all times.

### Specifications:

- **Light Output:** 1700 LM
- **CCT:** 6000K (+/- 350K)
- **Emitting Color:** White
- **Light Angle:** 120 degrees
- **Power:** 15W
- **Input:** 100 - 240V 50/60Hz 0.6A
