Square SQ2 x 50mm Ti-N Impact Driver Bits

Impact bits are engineered for high torque applications, the torsion zone absorbs torque peaks to reduce stress experienced through the shank which leads to cam out and tip breakages.

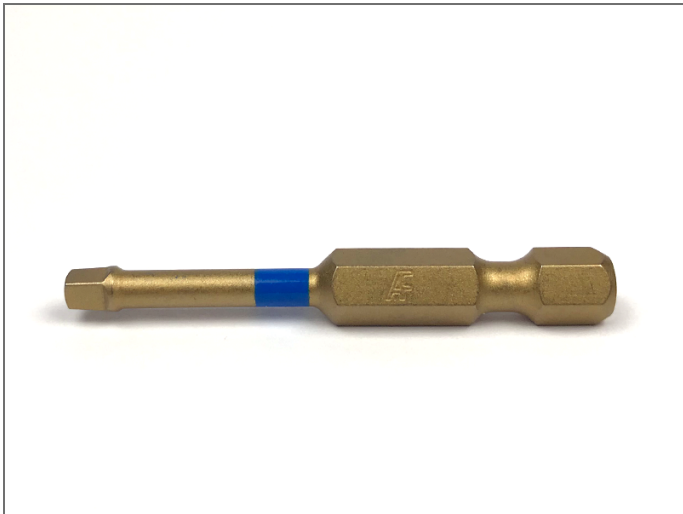

The hardened steel and titanium nitride coating increase bit strength and reduces fracturing.

Ideal applications with impact drivers, fastening or anchoring into hard material.

- **Bit Type:** Square
- **Bit Size:** No.2
- **Overall Length:** 50mm
- **Bit Material:** Tempered Carbon Steel
- **Finish:** Titanium Nitride (Ti-N)
