## Gesipa BULB-TITE Large Head Aluminium Rivet

Originally designed for the construction industry the Gesipa Bulb-Tite rivet has a large clamping force that is distributed evenly over a large surface area. This even distribution force allows for soft or thin materials to be joined without damage. The three plates of the closing head adapt the form of curved surfaces for varied applications, while also maintaining even clamping force and impressive shear strength.

- Rivet body: 5056 Aluminium.
- Stem/Mandrel: steel, zinc plated.
- Larger grip range
- Vibration & weather resistant
- Fits curved application

Recommended power tool: [GEISPA® Powerbird® with bulb-tite nose piece.](#)

## PRODUCT LIST

SKU	Rivet Dia x Length	Grip Range (mm)	Drill Dia.	Bx. Qty.	Crt. Qty.
