PROLOK Resytork Button Barrel Nut Galvanised

Low Security ● ● ●

Resytork Button Barrel Nut offers low security, it features with an internal pin in the six-lobe recess to repel any standard torx tools. A button head offers a smooth rounded, aesthetically pleasing flush finish and leaves no threads protruding. Thread is inside the sleeve of the barrel nut, ideal for clamping applications where both sides are visible. It requires a special driver to fix and tighten to desired torque. Available in Galvanised, Zinc and 304 Stainless Steel.
