## Particle Board Pan Head Screws Zinc

Particle board screws are a full length thread screw. The longer thread achieves greater engagement and higher pull out strength. Designed for composite timbers such as laminated particle board, craftwood or MDF.

Used by cabinet makers in domestic and commercial joinery

- Requires drilled countersunk holes for correct installation
- Phillips drive / countersunk
- Zinc plated for internal use

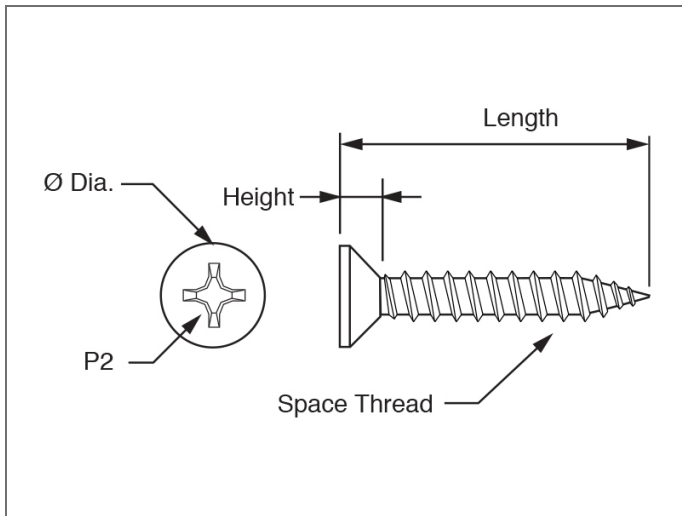

## TECHNICAL INFO:

### INSTALLATION

- **Drill Capacity:** For composite timbers such as laminated particle board, craftwood or MDF.
- **Driver Type:** 4g (Philips P1), 5g,6g,8g,10g (Philips P2)
- **Installation Speed:** 2300-2500 RPM Max Drill Speed

### PHYSICAL CHARACTERISTICS

- **Head Type:** Countersunk
- **Point Type:** Needle
- **Material:** Carbon steel
- **Finish:** Zinc - yellow
- **Head Dia:** 4g (4.9mm), 5g (6.3mm), 6g (6.9mm), 8g (7.8mm), 10g (9.9mm)
- **Head Height:** 4g (2.5mm), 5g (3mm), 6g (3mm), 8g (4mm), 10g (5mm)
