## M16 x 32mm Guard Rail Bolt Gr8.8 HDG

### Hi-tensile Splice Bolt

Australian standard M16 splice bolt and nut used for connecting w-beams rails together (8 per connection) commonly seen in highway barrier protection. Other guard rail applications include edge protection, protection of machinery and chemical storage such as gas and fuel pumps found at petrol stations or industrial factories.

- M16 diameter
- 32mm length – measured under head and including oval shoulder
- Grade 8.8 hi-tensile steel
- Hot dipped galvanised finish
- Mushroom head
