600mm AdjustaStairs® SafeSmart Access

The perfect solution for temporary height access on site. The [AdjustaStairs®](#) is a portable aluminium solution made in New Zealand – light weight, easy and quick to set up.

Each model is designed with a varying degree of height access, self leveling (600mm) treads are a unique design making these a worthwhile investment. Available in 3 sizes with adjustable height elevation from 1.9m to 4.0m. All versions come fitted with secure handrails and a midrail as standard.

AdjustaStairs® now come with a standard strutlock fitting allowing them to be locked in an open position without being fixed in – ideal for use on batters.

Features:

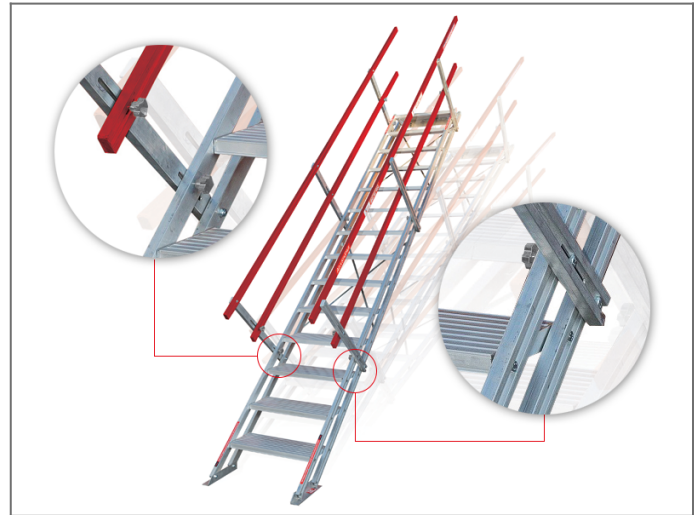

- 600mm Wide self-leveling treads.
- Folds flat for easy storage and transportation.
- Aluminium construction.
- Load tested to 500kg SWL

*Elevation range: suggested height range of stairs listed allows for a slope angle of between 32 – 48 degrees.

AdjustaStairs® is a registered trademark of [SafeSmart Access](#).
