## Sikaflex Pro PU Sealant

As a brand, Sika has been an iconic global phenomenon, with a history in construction stretching as far back as 1910. And in any trade, that's what you are looking for – products that are backed by expert knowledge and tried and tested successes. After all, quality products will help you do a quality job.

For all trades' sealing applications, you can't go past Sikaflex Pro PU sealant.

### Sealing Like a Pro

As a single component [polyurethane sealant](#), Pro PU is perfect for caulking joints in pre-cast and in-situ concrete, block and brick works, perimeter sealing, external cladding and curtain walls. Available in a large range of colours, this trade-grade Sikaflex sealant comes in either caulk gun or 600ml foil sausage packages.

Compliant to all relevant Australian and US sealant standards, Sikaflex sealant—particularly Pro PU—is suitable for:

- Expansions joints in a variance of masonry embedment situations.
- Precast/prefab concrete panel joint sealing.
- Infill panel joints.
- Sealing of door and window frames.
- Retaining walls
- And much more

## Advantages of SikaFlex Sealant

Don't risk the use of inferior sealants. Brands like Sika and Allfasteners' own [polyurethane sealants](#) are still around for many reasons. Backed by years of development and supported by knowledgeable staff, Allfasteners are only too glad to advise any tradesperson on the appropriate use of any caulked product.

With Sikaflex Pro PU, the list for why you should use it is extensive.

- Very good adhesion to all cement-derived surfaces, polyurethane, brick ceramics, most polyester, most timbers, most metals and brick ceramics.
- Extremely durable.
- Weather-resistant to a high level.
- Seals joints of up to 30mm in width without sagging.

1800 255 349 | [techadvice@allfasteners.com.au](mailto:techadvice@allfasteners.com.au)

- Brief skinning duration.
- Non-corrosive.
- Approved for use in potable water (AS4020:2005).
